Summary

Aspiring software engineer with experience in tech support, mobile development, and full-stack web development. Adapts and learns new tech stacks quickly, with experience working remotely in fast-moving startups. Seeking opportunities to apply and improve my current skills and experience as a software developer.

Work Experience

University of the Philippines Diliman Computer Center

Student Assistant (2019 - Present)

- Responsible in assisting students, faculty, and staff in their inquiries related to network-related problems within the University of the Philippines Diliman network
- Provided support for University of the Philippines Diliman in-house web services
- Assisted users in installing basic open-source software such as Linux

Kalibrr

Mobile Dev Intern (Jan 2022 - Jan 2023)

- Quickly learned Dart and Flutter to work on the Kalibrr mobile app on Android and iOS
- Improved the Kalibrr mobile application by implementing useful user features and solving significant bugs that affected the job search functionality of the application

D.W. Morgan

Backend Intern (Jun 2022 - Sept 2022)

- Quickly learned Ruby on Rails to improve the client-facing public order tracker of the company
- Improved the tracker by solving bugs that were affecting the search results of the tracker

DZUP 1602

Website Supervisor and Technical Support (Sept 2021 - Dec 2021)

- Managed security and implemented improvements as directed by the supervisors in preparation of the Eskwekalikasan project of DZUP
-
